

Transactions of the American Electrochemical Society Volume 11

By American Electrochemical Society

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 120 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: . . . constants of our apparatus varied in an irregular and unexplained manner from time to time in much the same way as described by Bousfield⁸ in his researches. We therefore made it a point to determine its constants with water immediately before and after every series of measurements. If the constants were found to have changed by over 0.75 per cent. , the measurement was discarded. The agreement was usually much better than this, in which case the mean value of the constants before and after the run was taken in the computation. ² For discussion of corrections applied see unabridged article. ³ W. R. Bousfield. Zeit, fur Thys. Chem. , J. , 257, 1905. Summary of Results. The final results of our investigation may be summarized as follows: 1. The curves representing the change of density with the temperature of sodium, potassium, lithium, and silver...
