Sustainable Design and Green Home Building

By Gaberella Green

GRIN Verlag GmbH Mai 2014, 2014. Taschenbuch. Book Condition: Neu. 210x148x1 mm. This item is printed on demand - Print on Demand Neuware - Scholarly Essay from the year 2013 in the subject Business economics - Operations Research, grade: 100, Argosy University, course: Strategic Planning & Implementation (B7223), language: English, abstract: Sustainable design and green home building are defined to develop their meaning. Both definitions provided insight on the meaning in regards to efficient use of resources. In addition, the major projects, scope, size, financial performance, and active names of three firms are revealed. The names of three active firms include Mungo Construction, National Community Renaissance and Fore Property Company. Mungo Construction teamed with Columbia Housing Authority for the major project. The major project included LEED certification and revitalization of a community in a naturally smart location. LEED certification involved elements like using efficient irrigation, the use of minimal VOC (volatile organic compounds) products, dual flush toilets, optimum efficiency windows and HVAC systems. A firm called National Community Renaissance partnered with La Quinta Redevelopment Agency. Also, Fore Property Company joined CANV Construction and constructed a project. The project integrated fresh construction skills and methods that help reduce power and water...
