On heating, it should volatilise without leaving any solid residue. The preparation, which contains crystals, should be used after melting them. 188 I.ACTYLPHENETIDIN. LICH. ISLAND. L ACT YLPH E N ETIDIN U M. Lactyl Phenetidine. CUH1SN0, =209.19 Colorless, odorless crystals, having a slightly bitter taste; soluble in about 500 parts of water, in 55 parts of hot water, and in 8.5 parts of alcohol. Melting point: about 118 C. If 0.1 g. of Lactyl Phenetidine be boiled for a minute with 1 ecru, of hydrochloric acid, diluted with 10ccm. of water, and be filtered after cooling, the resulting filtrate produces, with 3 ccrn. of chromic acid solution, a violet-red coloration. If 0.1 g. of it be dissolved in 10 ccm. of hot water and filtered after cooling, the resulting filtrate, on adding bromine water till it gets a yellow color, becomes considerably turbid,...
