Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.From the preface to this work, we learn that it is based on Dr. Drysdale's inaugural address as President of the Microscopical Society of Liverpool in 1874. The author makes no claim to original discovery, and his object appears to be to supplement and confirm what he had already said as to the biological views of the late Dr. John Fletcher, in a prior work entitled, *Life, and the Equivalence of Force*. This writer appears to have been the originator of the protoplasmic theory of life—a theory which postulates that every action properly called vital, throughout the vegetable and animal kingdoms, results solely from the changes occurring in a structureless, semi-fluid, nitrogenous matter now called protoplasm. It would be impossible, in the space which we have at command, for us to examine that theory fully; and we must content ourselves with referring to a few of the most salient points discussed by Dr. Drysdale in the present work. We are glad to see that our author, while asserting the priority of Fletcher's theory, does credit to the labours of Dr. Beale, whose researches require that he should be accredited as the actual demonstrator of the truth of that which had before only been hypothetically advanced. The theory, *nihil vivum nisi protoplasma*, now established, includes not merely the origin, but also the continuance of life, every particle which goes to form the organized structure and its secretions having first to enter into and become part of the living, semi-solid matter itself, and the decay of protoplasm being necessary to give rise to the actions which are the marks of vitality. The death of protoplasm must result in the...
